

GET INVOLVED *with Blood Drives*

*Submitted by Meghan Homa
Region II Vice-President*

The average adult has about 10 to 12 pints of blood in his or her body. Losing more blood than what is needed for the body to function can cause serious damage. In order to restore the blood loss, there is a need for blood donors. Blood cannot be manufactured therefore we need the help of any person fitting the criteria to donate blood.

With this information, a great community service project for your chapter is sponsoring a blood drive. Many high schools across the country hold blood drives. The way you can get involved is by donating blood yourself and/or recruit possible blood donors. Even if you do not donate yourself, recruiting donors will help you save the lives of many people.

For more information on how to sponsor a blood drive or help with one, please contact you local American Red Cross or other local blood donating centers.

INDIANA

American Red Cross Donation

Indiana Chapter President, Jason White presents a check for \$1000 to local American Red Cross Director Mary Ellen Anable. The students raised the money for hurricane relief through their annual fund-raiser. The chapter (I-HOSA) includes students from Columbus East, Columbus North, McDowell, Jefferson, Hauser, Brown County, Seymour, Crothersville, Greensburg, North and South Decatur, and Ivy Tech.
