

Medical Reading books for NLC 2012 **REVISED!**

The Medical Reading book list was published on May 1, 2010. At that time, all 5 recommended books were in print. Since then, *Diagnoses from the Dead* has gone out of print. It is available as an eBook at BarnesandNoble.com for \$5.99. Out of respect to those schools who already purchased this book, we are leaving it on the list as an alternate book, and adding *Body of Work* as a second alternate. *Body of Work* was a Medical Reading book in 2008-09. Teams have a choice of reading either *Diagnoses from the Dead* OR *Body of Work*, and will tell the judges which book they wish to be questioned from at the start of Round Two.

These are the four primary books. ALL questions from the Round One written test AND 16 of the 20 Round Two short answer questions will come from these books.

These are the two alternate books. Teams should read one or the other, and then be prepared to answer questions from their chosen alternate book during Round Two.
